Product Data Sheet SORB®MS Marine Solutions BARRIER CRATE

Product Information:

The Barrier Crate is a compact and convenient long-term storage and transportation solution for Containment Booms. Storage crates neatly contain and protect booms, while doubling as a system that boom can be deployed from and recovered to. The crate can be fitted with rapid-deployment rails (racks), for fast deployment Oil-Barriers with minimum personnel required. Racks allow the boom to be stored in a very compact arrangement and keep the boom ready to deploy in an emergency response.

Application

- for the temporary storage of Oil-Barriers

Key Features

- compact minimizes space requirements
- ideal for rapid deployment and recovery operations of a variety of booms
- permeable floors provides drainage and ventilation
- stackable
- optional rapid-deployment rails

Technical Data

The crate is manufactured with hot-dip galvanized (HDG) steel, marine-grade aluminium and/or stainless steel. The punched floor plate provides excellent drainage and ventilation of the stored boom. Forklift slots and lifting eyes promote easy lifting and transport operations. Its compact dimensions make them easy to handle and allow them to be stacked, reducing storage space requirements. Custom options depending on the boom type and operational needs are available, including containerized options. An optional cover provides increased protection
